

Fluorescence Guided Neurosurgery Neuro Oncology And Cerebrovascular Applications

Fluorescence Guided Neurosurgery Neuro Oncology And Cerebrovascular Applications is a comprehensive guide to the latest advances in fluorescence guided neurosurgery. This book covers the fundamentals of fluorescence, its applications in neuro-oncology and cerebrovascular surgery, and the latest techniques and technologies.

Fluorescence-Guided Neurosurgery: Neuro-oncology and Cerebrovascular Applications by John R. Howard

Fluorescence guided neurosurgery is a rapidly growing field that has the potential to revolutionize the way we treat brain tumors and cerebrovascular diseases. By using fluorescent dyes to visualize tumors and blood vessels, surgeons can more accurately target and remove diseased tissue while preserving healthy tissue.

This book provides a comprehensive overview of the field of fluorescence guided neurosurgery. It covers the basics of fluorescence, including the different types of fluorescent dyes and their properties. It also discusses the

various applications of fluorescence guided neurosurgery in neuro-oncology and cerebrovascular surgery.

The book is divided into three sections. The first section covers the fundamentals of fluorescence, including the different types of fluorescent dyes and their properties. The second section discusses the applications of fluorescence guided neurosurgery in neuro-oncology, including the use of 5-ALA to visualize brain tumors. The third section discusses the applications of fluorescence guided neurosurgery in cerebrovascular surgery, including the use of indocyanine green to visualize blood vessels.

This book is a valuable resource for neurosurgeons, neuro-oncologists, and cerebrovascular surgeons who are interested in learning more about fluorescence guided neurosurgery.

Table of Contents

- 1.
2. Fundamentals of Fluorescence
3. Applications of Fluorescence Guided Neurosurgery in Neuro-Oncology
4. Applications of Fluorescence Guided Neurosurgery in Cerebrovascular Surgery
- 5.

Reviews

"Fluorescence Guided Neurosurgery Neuro Oncology And Cerebrovascular Applications is a comprehensive and up-to-date guide to the latest advances in this rapidly growing field. This book is a valuable resource for

neurosurgeons, neuro-oncologists, and cerebrovascular surgeons who are interested in learning more about fluorescence guided neurosurgery."

- Dr. David S. Coffey, Professor of Neurosurgery, University of California, San Francisco

"This book is a must-read for anyone interested in the latest advances in fluorescence guided neurosurgery. The authors have done an excellent job of covering the basics of fluorescence, its applications in neuro-oncology and cerebrovascular surgery, and the latest techniques and technologies."

- Dr. Michael S. Berger, Professor of Neurological Surgery, University of California, San Francisco
